LynTec Makes Power Play & Adds New General Manager/VP to Corporate Team

May 10, 2012 - Lenexa, KS – LynTec the leading provider of controllable circuit breaker panels is proud to announce a new executive staff addition and welcomes Alan Tschirner to the role of General Manager/Vice President.

Considered an expert in communication, controls and electrical systems, Tschirner brings over 30 years of expertise to the position. His previous experience includes VP of Engineering positions at Time Warner Cable and National Cable Television Cooperative.

In his role at NCTC, Tschirner provided engineering leadership and solutions to member companies that operated in small and mid-sized markets. At Time Warner, his engineering functions included construction, fleet, facilities, warehouse service and maintenance. Tschirner led the launch of high speed data and digital video services to 300K metropolitan subscribers.

Now at LynTec, Tschirner will oversee the company's engineering, production and the company's more advanced / complex electrical solutions to respond to customer demand. He will focus his time on opportunities in energy management, lighting, current monitoring, reporting and alarming. About the position, Tschirner states, "LynTec has long been a thought leader in power and lighting controls and setting the bar for excellence. I am proud to be a part of its executive team and eager to integrate my previous experience to help grow our solutions for audio, video, lighting and power."

Mark Bishop, president of LynTec adds, "Alan sees the tremendous potential for growth our company has. He is a natural fit for us, and we are excited to have him help guide our day to day engineering solutions and expand our capabilities."

Tschirner's education includes Penn Valley Community College, Denver University, Pioneer Community College and the Kansas City Electronics Institute where he studied human relations in business, finance and accounting, mid management supervision, and electronics. In addition, dedication to his industries has always been part of Tschirner's acumen and he has been an active member of FCC's Communications Security, Reliability and Interoperability Board and a National Board and Executive Committee Member of the Society of Cable Telecommunication

Engineers. His professional credits include certifications as a broadband communication technician and engineer.

Tschirner will be joining LynTec at InfoComm12, a mega trade show event held in Las Vegas in June, and looks forward to building new relationships and new opportunities for LynTec. Visit LynTec at the event and meet their new GM/VP in Booth #9536.

About LynTec

LynTec brings to market electrical protection and circuit switching capabilities in the same enclosures. In doing so, the company has always found ways to save space, lower system installation costs and build trusted relationships with audio system and lighting designers. Its expansion into electrical and lighting controls, and now its growth into expanded lighting control, energy monitoring, built in power conditioning, and mobile applications continues to position the company as a leading resource for the AV and lighting industries and an integral partner for sustainable energy practices.
