

Wherever There is Pro AVL . . . There is LynTec

Every power control panel LynTec has ever made is reliable, protective and brilliantly simplistic. Switching at the circuit level is our legacy. While our heritage is in venues like Madison Square Garden, the Austin City Limits Stage at the Moody Theater and the like, our future is everywhere there is amplified sound, performance lighting and distributed video to control.

DDR

DMX DUAL RELAY POWER MODULE

The LynTec DDR is a rugged, dual-relay DMX module engineered for reliable power control in demanding outdoor and professional venue environments. Supporting both DMX and RDM protocols, it delivers intelligent, remote-controlled switching with dependable high-current performance and flexible mounting options.

Product Highlights

20A PowerKon IP65 input

Dual PowerKon IP65 outputs for secure power connections

DMX512 compatibility with five operating modes, including DMX Sense

M12 and M10 threads for clamp/truss mounting (clamp sold separately); and a hole for a safety cable (sold separately)

Full RDM support for remote discovery and addressing

IP65-rated enclosure for outdoor and harsh environments

5-pin XLR DMX input and pass-through output

LED indicators for power and DMX status monitoring

Voltage range (100-240VAC) for global applications

Includes power cable with regional connector options

Dim. 6.0" L x 5.0" W x 2.25" H
(15.24 x 12.7 x 5.72 cm)
Weight 1.3 lbs (0.59 kg)
